Clocks, Ltd.

INTRODUCTION

We began our business as importers of antique clocks. Dealers sought them out—clock collectors loved them. But as the sources of antique clocks became fewer and fewer, we began to seek ways in which we could produce the magnificent timepieces of yesterday, today.

We wanted to offer the same fine craftsmanship...the skillfully carved textural warmth of the finest woods...and the same finely tuned accurate movements that made antique clocks so prized by lovers of quality and beauty.

Over the past few years, we've developed the sources to produce the time-keeping works of art we now offer. Our artisans proudly hand carve solid wood, then through seven painstaking steps bring it to the finish of fine furniture.

Our movements are made of solid brass...no coatings over inexpensive metal...no shortcuts leading to loss of quality.

Our newest selections, which we proudly present here, are ultimate statements of the charm of the old, priced so that every home can enjoy the pride of ownership.

We are very pleased that antique dealers, jewelers, the finest clock shops, prestigious mail order companies—Diner's Club, American Express—across the country have featured our clocks. We hope that you and your customers will enjoy our exceptional recreations for many years to come.

QUALITY MOVEMENTS

We take as much pride in the precision quality movements we build for our clocks as we do in their exterior beauty.

All of the clocks shown in this catalog have high quality Korean movements, with the exception of West Germany's world famous "Hermle" Westminster Chime Movements, and our Westminster Quartz Movements from Japan.

All movements must pass a series of rigid tests before they are mounted in their cabinets. As an example of our confidence in our quality we offer a full 12-month warranty against defects in workmanship.

Both weight driven movements (334R and 335J) are non-striking, time only, 8-day movements. The 31-day key wound, spring driven movement (including calendar movement), strikes softly on the half hour and counts the hours. The 8-day, key-wound, spring driven movement strikes softly as it counts the hours. All clocks described as 31-day and/or 8-day, unless described otherwise, are spring driven movements.

**a. #332S 31-DAY, SPRING
DRIVEN**

31-day key wound spring driven movement strikes softly on the half hour and counts the hour on a spiral gong or brass bell.

**b. #333M 8-DAY, SPRING
DRIVEN**

8-day, key wound, spring driven movement strikes softly on the hour on a spiral gong.

c. #334R RAILROAD
REGULATOR, WEIGHT DRIVEN

8-day, non-striking, time-only movement with Graham's Dead-Beat escapement, cut steel pinions, seconds bit, retaining power.

**d. #335J JEWELER'S
REGULATOR, WEIGHT DRIVEN**

8-day non-striking, time-only movement with Graham's Dead-Beat escapement, cut steel pinions. Beats seconds, seconds bit, beat regulator, retaining power. Takes mercury or brass pendulum.

e. #351-020 HW WESTMINSTER CHIMES

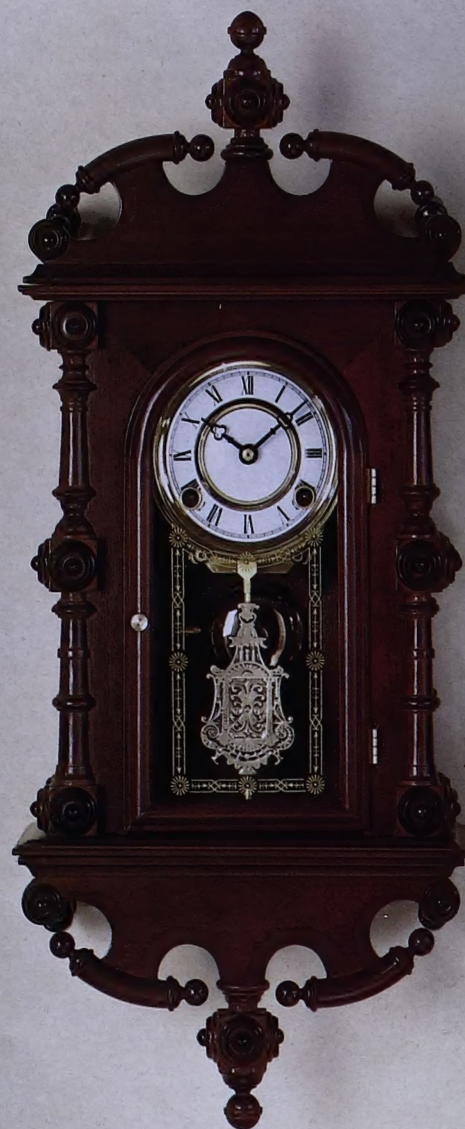

8-day key wound movement chimes every quarter hour with classic Westminster Chimes and counts the hour. Made by the renowned "Hermle" of West Germany, one of the world's leading manufacturers of such movements.

THE PATTI SERIES

The beautiful, circa 1860, Patti Models from the E.N. Welch Company of Forestville, Connecticut are highly prized by collectors. Inspired by the Patti Models, Clocks, Ltd. has added lower scrolls and other fine original touches. We're proud to introduce these charming adaptations...

AMERICAN REGULATORS

SALE PRICE!

7012
ROSE REGULATOR

Our artisans, inspired by the ornate Vienna Regulator of 1880, hand carved solid walnut into the graceful rosettes so popular in the Victorian era. White baked enamel dial features Roman numerals, brass trim and serpentine hands. Brass R/A pendulum gleams behind the black, gold, red and green silkscreened glass door. 34" high, 15" wide, 31-day.
\$269.00

NOW \$215.00

8100 CLOCKS, LTD'S REPRODUCTION OF THE
ANSONIA REGULATOR #4 Originally introduced
by the Ansonia Clock Company of New York 1860.

A beautiful achievement...our recreation of an early (1860) Ansonia Watchman's Regulator recalls the charm of a gentler era. Walnut case with pediment scroll top, classic slender frame, beautifully detailed, hand-carved skirt. Solid brass bezel, antique-tone dial with Roman numerals, dramatic thin hands. Large compensating nine rod lyre pendulum behind beautifully beveled glass. 47" high, 13" wide, 31-day.
\$350.00

SALE PRICE!

1318
GILBERT "COLUMBIA"

In 1880 the William Gilbert Clock Company of Winsted, Connecticut created the original Columbia—one of the most intricately detailed clocks ever made in America. For lovers of the gilded era of the 1880's, we offer our Columbia in solid walnut with heavily carved pomegranate, crown and floral designs. Baked enamel contoured dial displays Roman numerals, brass trim, Maltese hands. Brass pendulum ticks gently behind the door, which is silkscreened in silver with flower bouquet motif. 37½" high, 15" wide, 31-day.
\$279.00

NOW \$223.00

4716
WATERBURY "ALTON"

Skillfully hand carved swirls and flowers edge the sweeping lines of the solid walnut case of this clock originally produced by the Waterbury Clock Company of Waterbury, Connecticut in 1880. White baked enamel dial trimmed with brass, Moon hands. Graceful brass lyre pendulum; silkscreened glass in gold. 38" high, 15" wide, 8-day.
DISCONTINUED

AMERICAN REGULATORS

**1901 A
RAILROAD REGULATOR—
SPRING DRIVEN**

Great-grandfather may have set his pocket-watch by the original of such a turn-of-the-century Railroad Regulator. We've recreated its classic spare lines in solid walnut. The large antique-tone dial is set off by Roman numerals, brass trim and bezel, Moon hands. Brass pendulum sways behind the black and gold silkscreened Regulator glass. 37½" high, 17½" wide, 31-day.
\$269.00 DISCONTINUED

**4752
STORE CALENDAR**

Originally made by Sessions Clock Company of Forestville, Connecticut in 1903, the Store Calendar provided our practical ancestors with the day of the month, as well as the time. We've recreated it in solid walnut, with burnished hand carved rosettes curving around the door and upper pediment. Antique-tone dial. Brass pendulum. Silkscreened black and gold Regulator glass. 25" high, 15" wide, 31-day.
\$249.00 DISCONTINUED

**4110
PEANUT REGULATOR**

Here's the amusing peanut shaped 1880 Seth Thomas Regulator, newly recreated in solid walnut and rosewood veneer, accented by a royal crown center brass plate. Roman numerals. Brass pendulum. Glass brightly silkscreened in black, maroon and gold with stylish "Peanut Regulator" in the center. 25½" high, 10¾" wide, 31-day.
\$189.00

NOW \$151.00

WESTMINISTER CHIMES

Our clocks' Westminster Chimes echo the sounds of the bells in the Victoria Clock Tower in the Houses of Parliament in London. There, small bells play music inspired by Handel . . . and famous "Big Ben" strikes the hours.

4800W VIENNA "EMPIRE" REGULATOR

A clock to chime the golden hours in your life . . . and for generations to come. We've recreated the classic design of the Vienna "Empire" period—circa 1810—in solid mahogany. Fine beveled glass in front and sides of cabinet complements the gleaming wood. White baked enamel dial has a stepped-back center, etched Roman numerals, solid brass bezel. Added touches—the brass wreath motif on the cabinet front and the charming scene and NAWCC registered "Tempus Regit Vitam" on the pendulum which reminds us that "Time Rules Life". Eight day West German "Hermle" Westminster Movement melodiously chimes each quarter hour and counts the hours. 36½" high, 13¼" wide, 8-day, Westminster. \$550.00 DISCONTINUED

4802

Same as 4800W but in Walnut with Lge Lyre Pendulum and 31-day movement. \$350.00 DISCONTINUED

4708W LARGE FREE SWINGER

A massive German Free Swinger of 1850 is recreated with heavily hand carved designs, brass ornaments, finials, turned wood columns—ornate beauty in solid walnut and brass! Unique scrollwork decorates dial. Brass lyre pendulum. Westminster Chime Movement by "Hermle" of West Germany chimes each quarter hour, counts the hour. 44½" high, 18" wide, 8-day, Westminster. DISCONTINUED

5903W SERPENTINE

For those who truly appreciate the woodcarver's art, here's a remarkable achievement in fine cabinet making—a recreation of a famous 1860 Austrian Serpentine Regulator. Solid walnut, deeply hand carved upper scroll, door and lower drop. White baked enamel dial. Brass lyre pendulum. Westminster Chime Movement by "Hermle" of West Germany chimes each quarter hour, counts the hours. 45" high, 15" wide, 8-day, Westminster. \$500.00

MANTLE/SHELF CLOCKS

SALE PRICE!

4760 CLOCKS, LTD'S REPRODUCTION OF THE ANSONIA "MONARCH" Originally introduced by the Ansonia Clock Company of New York in 1880.

The intricate detailing and touches of gleaming brass on the Monarch made it an immediate favorite when first introduced by the Ansonia Clock Company of New York in 1880. This acclaimed and sought after collectible is recreated in solid walnut, meticulously carved, crowned with a unique bowl type finial. Solid brass bezel, etched brass dial... highly unusual tubular brass pendulum truly sets this clock apart. 25" high, 13 1/4" wide, 31-day. **NOW \$223.00**
~~\$279.00~~

Clocks, Ltd.

... Presents ...

THE CONVERTIBLE CLOCKS
A Revolution in timekeeping!

2 clocks that give you time and weather, plus 5 special ways to display them in your home.

- It's a WALL CLOCK!
- It's a TABLE CLOCK!
- It's a SHELF CLOCK!
- It's a MANTEL CLOCK!
- It's a PENDULUM CLOCK!

8110
CONVERTIBLE CLOCK

A charming clock for any setting, the Convertible Clock has a finely crafted, hand-carved solid walnut cabinet and quartz Westminster movement. Attractive brass lyre pendulum or distinctive large French weather instrument with barometer thermometer can be mounted in the lower circle of the cabinet. Simply remove the top and bottom and this wall clock converts to a shelf clock, or remove the bottom only and this versatile time instrument becomes a table or mantel clock. Clock runs on a single "C" battery. (Battery not included.) 23" high, 12" wide.
\$149.00 Pendulum and Weather Instrument

8125, 8126
CONVERTIBLE CLOCK

This versatile Convertible Clock is also made of hand finished solid walnut. Complete with precision quartz Westminster movement, distinctive Arabic numerals, lyre pendulum, optional French weather instrument, solid brass enameled dial and hand carved pillars. Clock runs on a single "C" battery. (Battery not included.) 20 1/2" high, 10 1/2" wide.
8125 \$129.00 Pendulum only
8126 \$149.00 Pendulum and Weather Instrument

410
PEANUT-WEATHER
CLOCK

Delightful reproduction of the classic "Peanut" clock with precision quartz Westminster movement, Roman numerals and high quality French weather instrument. Handsome hand finished cabinet in solid walnut. Clock runs on a single "C" battery. (Battery not included.) 25" high, 11" wide.
\$219.00

450
ST. MARK

Attractive time and weather station. Slim cabinet made of finely crafted hand carved solid walnut, precision quartz movement and French weather instrument consisting of barometer and thermometer. Clock runs on a single "AA" battery. (Battery not included.) 21" high, 9" wide.
\$149.00

CLASSIC EUROPEAN KEYWIND CLOCKS

NEW
FOR 1984

805
"ST. JOHN" REGULATOR

Intricately detailed, hand carved broken pediment at the top and delicate scrolls at the skirt. Made of solid walnut, enamelled solid brass dial with Arabic numerals, keywind movement strikes once on the half-hour and counts the hour. Top and bottom are removable, so clock can also be displayed as a mantle or shelf clock. 26" high, 12" wide, 31-Day. \$139.00

807
VIENNA FREE SWINGER

An outstanding showpiece and a beautiful rendition of the famous clocks of the 1870's. Hand carved solid walnut cabinet with exquisitely detailed broken pediment. Simulated brass weight shells, delicately embossed brass dial with Roman numerals and solid brass keywind movement strikes once on the half-hour and counts the hour. 24" high, 12½" wide, 31-Day. \$179.00

4406
HEIDELBERG

Classic reproduction of a European Clock. Solid oak, hand carved cabinet, magnificently beveled glass on door and side glass add an unexpected touch of elegance. Solid brass enamelled dial with Roman numerals and authentic scrolled solid brass pendulum marks this clock as an antique of the future. Solid brass keywind movement strikes once on the half-hour and counts the hour. 20" high, 8" wide, 31-Day \$149.00

4900
VIENNA REGULATOR

Inspired by the classic clocks created during the Empire period of 1804-1814, the hallmark of this clock is a slender, stately case with glass on the sides and in the door. This solid walnut clock features a beautifully carved design on the pediment plus four skillfully hand-carved swirls at each corner of the door. The beveled glass in the doors and sides accents the hand rubbed and finished beauty of the cabinet. Solid brass lyre pendulum with delicate embossed brass bezel and the intricate design of the inner dial, delicate Roman numerals add the final touch of elegance to this recreation of a bygone era. 34" high, 12" wide, 31-Day. \$249.00

CLASSIC AMERICAN RAILROAD REGULATOR KEYWIND CLOCKS

1901R
RAILROAD REGULATOR

A splendid recreation of the turn-of-the-century railroad regulators. Cabinet made of solid walnut, classic antique-tone dial displays picture of onrushing steam locomotive and authentic Arabic numerals. Brass trim and bezel and moon-style hands recapture this early 20th century feeling. Traditional brass pendulum sways gently behind the black and silver silkscreened Regulator glass. Solid brass keywind movement strikes once on the half-hour and counts the hour. 35½" high, 15½" wide, 31-day. \$269.00

4752R
STATIONMASTER CLOCK

Brilliantly hand carved solid walnut cabinet is a classic reproduction of the original clocks created by the Sessions Clock company in 1903. Hand polished intricately carved rosettes curve around the door and accent the skirt. The antique-tone dial provides the date as well as the time. The nostalgic scene from early American railroad history silkscreened on the glass door enhances and recaptures this turn-of-the-century era. Distinct Roman numerals and solid brass, keywind movement strikes the half-hour and counts the hour. 28" high, 14" wide, 31 Day. \$249.00

CLASSIC REPRODUCTION CLOCKS WITH QUARTZ MOVEMENTS

NEW
FOR 1984

**809W
LITTLE COTTAGE**

The enchanting simplicity of the cottage clock will add a warm touch to any room in your home. Cabinet made of gleaming solid walnut accented with broken pediment at top. Remove the top and bottom hand carved elements and clock becomes a shelf clock, remove just the bottom and the clock is a table or mantel clock. Solid brass enamelled dial with easy-to-read Arabic numerals. Classic brass lyre "R/A" pendulum with precision quartz movement. Runs on a single "C" battery. (Battery not included.) 22" high, 11" wide.
\$139.00

809

Same as 809W, with keywind 31 Day movement.
\$139.00

**7020
DEMI SERPENTINE**

A fascinating recreation of a classic European model. Slender, defined solid walnut cabinet, authentic Roman numerals, precision quartz Westminster movement that strikes once on the half hour, counts the hour and sounds the charming Westminster melody on the hour. Runs on a single "C" battery. (Battery not included.) 23½" high, 9½" wide.
\$149.00

**7050
DANBURY**

Seth Thomas created this charming classic in 1870 . . . and we've recreated it in solid walnut, with scroll and leaf design on a classic pediment base. Turned wood bezel. Brass trimmed antique-tone dial with Roman numerals. A graceful beauty to accent a fireplace mantle or bookcase. 18½" high, 26" wide, 31-day.

**2701M
MINI REGULATOR**

A perfectly realized miniature reproduction of the dramatic Vienna Regulator of the 1850's to accent a special corner. Solid walnut with ebonized side columns, trims and finials. White baked enamel dial, brass trim. Mini brass R/A lyre pendulum. 25" high, 9" wide, 31-day.
\$119.00

**3701E
EAGLE REGULATOR**

The stately eagle spreads his proud wings across our recreation of the popular German Regulator. In solid walnut with turned wood columns, scrolls and finials. View clockwork through side glass. White baked enamel dial, brass trim, Serpentine hands. Brass R/A lyre pendulum. 33" high, 13 1/2" wide, 31-day.
\$189.00

Here are Westminster melody clocks, a special addition to our line echoing the bells in London's House of Parliament Victoria Tower, filling the room with softly melodious chimes ... counting the hours faithfully, day-after-day.

Our miniature reproductions of the Vienna clocks Great-Grandmother loved are warmly interpreted in solid walnut. The Demi-Biedermeier reflects the glorious beauty of our larger versions with hand carved olive leaves and rosettes... twin horses rear atop the Lenzkirch.

QUARTZ WESTMINSTER

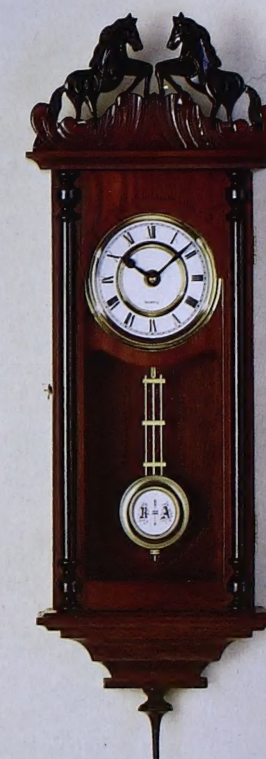

But they offer something Great-Grandmother never dreamed of... the accuracy of today's Quartz movements. Ours are the best quality available imported from Japan—and they run for one year on a single C Battery. (Battery not included)

The best of both worlds... a faithful reproduction of a fine antique, hand carved, rubbed and polished by caring craftsmen—and the accuracy and minimal care of today's Quartz movements, with tinkling Westminster melody!

RAILROAD REGULATOR

8200 RAILROAD REGULATOR—WEIGHT DRIVEN

In the late 1880's a familiar sight was the town stationmaster checking his watch against the clock that hung on the railroad station wall. It kept the most accurate time in town!

Almost every American clockmaker offered a "Railroad Regulator"—non-striking, of course, because the strike would disturb the accuracy of the time-keeping mechanism. One of the best Regulators was produced in 1880 by the Ansonia Clock Company of New York...and we've recreated it for today's world in solid walnut.

It's a no-frills clock. None of the ornate carvings or brass decorations found on most clocks of that era. This was a working mechanism, made for hard-working people.

But "no frills" doesn't mean unattractive. Look at the simple, clean lines of the wood. The fine, glowing furniture quality finish.

And we've exactly reproduced the same high quality, weight driven mechanism...solid brass...Graham's Dead-Beat escapement, precision cut gears, steel pinions, seconds bit, heavy brass plates, retaining power, five pounds of lead encased in a brass shell, brass cable and pulley, brass pendulum with cast iron back and solid brass beat scale. Even the silkscreened lower glass with its scrolls and Regulator—a true copy of the original—is a statement of quality. Another touch of authenticity—the white enamel dial with large, easy-reading Roman numerals. 36" high, 16" wide, 8-day. \$600.00

AMERICAN WEIGHT REGULATOR

SALE PRICE!

8300 REGULATOR NO. FIVE

The Seth Thomas Regulator No. Five, produced in 1880 stands as a magnificent example of the famous clockmaker's work. We've proudly recreated his splendid work in gleaming solid walnut, with touches of ebony for accents.

The deeply carved sunburst crown draws the eye to the exceptionally finished cabinet, with its gleaming side columns and hand turned finials. Meticulously constructed from top to bottom, this cabinet—as in all our clocks—required seven steps of sanding, staining and rubbing to provide the finest quality furniture finish.

The time-keeping mechanism is a reflection of the care we take to assure accurate time as well as exterior beauty. The solid brass movement has Graham's Dead-Beat escapement, precision cut gears and steel pinions, seconds bit, heavy brass plates, retaining power, five pounds of lead encased in brass, brass cable and pulley, brass beat scale. The gleaming brass pendulum is backed with cast iron.

Here is a stunning time-piece to adorn the wall of the true clock-lover! 50" high, 18" wide, 8-day. \$650.00

AMERICAN JEWELER'S REGULATORS

8400 WELCH REGULATOR NO. ELEVEN

Delicate line carvings curve along the slim cabinet of our perfectly realized reproduction of the 1880 E. N. Welch Company's Regulator No. Eleven.

Our solid walnut recreation becomes the focal point of any room—livingroom to library to office. Its stately charm is enhanced by its specially built time-only movement, featuring Graham's Dead-Beat escapement, cut steel pinions, seconds bit, retaining power, beat regulator and heavy brass plates. Eight pounds of lead weight in the brass shell drives the movement, while the cast-iron backed brass pendulum, suspended by an ebonized rod sways gently behind the front glass. 24K gold leaf "Standard Time", painstakingly hand applied in the old manner. A copy of the Welch beat scale adds a finishing touch to the authenticity of this beauty. 65" high, 19" wide, 8-day.

8500 STANDARD TIME

A mere half dozen of the Edward Howard Company of Boston hanging Jeweler's Regulator are known to exist today. They are treasured in fine Clock Museums and by a few discriminating clock collectors. We are privileged to offer this LIMITED EDITION RECREATION of just 200 clocks—breathtakingly hand carved from solid walnut, with a precision movement developed especially for this masterpiece.

The movement offers the best elements of accurate timekeeping, including Graham's Dead-Beat escapement, cut steel pinions, retaining power, beats seconds, seconds bit, built in beat regulator. It is driven by 8 pounds of lead weight encased in a gleaming brass shell. A Mercury Pendulum has four barrels of hand-cut crystal, each filled with two pounds of mercury, fitted to heavy brass casings and secured by two stainless steel rods. The mercury responds to the temperature changes of the pendulum rod, so that its accuracy is within a variation of three seconds a month. No other type of pendulum clock can match that accuracy.

Detailing is true to the original, down to the 24K gold leaf "Standard Time", painstakingly hand-applied in the old manner. The Standard Time, 8500, is an inspired statement of quality, worthy of being treasured by generations to come.

Just 200 discriminating buyers will own these clocks, which come with a Certificate of Limited Edition, brass name plate to identify the owner, timing instructions and a special Two-Year Warranty. 79" high, 24" wide, 8-day.
